

VELVET LANTERN / THE HOUSE HAS TEETH

Confirmed direction: Maid — defense or assassination. Courtesan — healing, buffing or debuffing. Synthesis — three cultures combined, generally ranged.

Build direction — proposal for review

Follow one connected promotion path. Each class contributes the two skills printed on its card: keep learned ancestor skills, with explicit upgrades replacing earlier versions. No attribute gates are proposed. Six separate discipline choices allow personal variation; choose one per numbered column, two per tier. Unlock levels, point costs, respect rules and exact balance still need confirmation. This proposal does not change the implemented class-selection system.

MAID

Keep the house safe. Smile, assess the room, then decide who is allowed near your people.

COURTESAN

Read what people need: comfort, courage, or a reason to doubt themselves.

SYNTHESIS

Three cultures, one practiced technique. These are usually ranged combatants, not three unrelated modules.

MECHANICAL CONTRACT / FIRST-PASS PROPOSAL

Velvet rulings Maid retains Bow/Sword/Shield/Dagger access; Sophie can begin with a bow and still become a Head Maid. A concealed-dagger action requires a carried owned dagger and uses its might, Hit, Crit and weight for your offensive strikes in that exchange, then returns to the prior loadout. It does not grant an extra attack. Distracted means adjacent to another living ally of the attacker; this represents an opening, not literal facing or invisibility. Courtesan healing and Synthesis status effects are magical; Courtesan social buffs/debuffs and Maid orders are not. Generally ranged does not forbid future melee Synthesis variants.	
Action and timing First-pass design proposal, not an implementation claim. Numbers are starting balance values. One normal activation per unit each player phase: move, then one Action (attack, support, item or Wait). Actions end normal movement unless stated otherwise. Free and Mode skills do not spend that action. A round is one player phase plus one enemy phase; 1/round uses reset at player-phase start. Map uses reset only on a new battle or restart. Durations measured in target activations count the next N activation starts after application and end after the last such activation; a regeneration tick occurs at each counted start. An effect ending at your next activation expires before your movement; an effect ending at activation end may be used during it.	
Combat and movement An attack skill replaces the normal attack and uses normal hit, block, crit, counter and speed follow-up rules unless stated. One opening strike per initiated exchange; an ordinary melee strike uses Str + might vs Def, magic uses Mag + might vs Res. A single magical skill strike without listed Hit uses 85 Hit and no speed follow-up. Prevention of a counter also prevents defender follow-up and Riposte. All distances and adjacency are cardinal Manhattan distance. Movement must follow a walkable path with normal terrain costs unless stated; swaps and pushes require legal destinations. Bonus movement is not a new activation.	
Stacking and reactions Hit, Crit, Block and Avoid bonuses are percentage points. Round down fractional damage/healing unless specified; HP stays between 0 and maximum. Apply percentage damage changes to resolved strike damage after mitigation/block, before HP loss. Outgoing skill damage scalars multiply with the strongest applicable incoming damage reduction; multiple incoming reductions do not stack. Same-name bonuses refresh; different named stat bonuses stack, but each movement trigger grants a choice of one bonus move per exchange/action. Generated splash, turret, Husk and reaction strikes do not trigger additional skills unless explicitly stated. Death bookkeeping still runs; kills by a controlled Husk or turret credit the owner with normal killer XP. Temporary units themselves award no XP when destroyed. A defeated caster loses auras immediately, but already applied timed statuses expire normally. One interception per exchange; controller chooses among eligible defenders. Resolve displacement after combat, never midway through its strike order.	
Status and content boundaries Pinned: -2 Move, minimum 1. Shaken: -15 Hit. Exposed: -3 Def and -3 Res. Bleed: lose 3 HP at each of the next 2 activation starts; can kill. Stat penalties never reduce Move below 1 unless explicitly 0. A target can hold one named body enhancement; replacing it does not erase owed penalties. Healing cannot revive; life-saving wards do not stack, and only one is consumed on a lethal strike. Proposed hooks include active skills, timed statuses, orders, entry reactions and temporary units; implement those hooks before shipping these definitions. These pages do not alter Mihata or grant new permanent campaign systems.	

VELVET LANTERN / PERSONAL DISCIPLINES

Choose the gestures that make this character feel like your Head Maid, hidden assassin, confidante or ranged synthesist.

Six choices, one character

Choose exactly one skill from each numbered column, two per tier. Mix rows freely within this board; no prior skill in the same row is required. A skill naming another technique includes that technique only when explicitly stated. Equipment requirements still apply. Class signature skills come from the separate promotion tree. Values and progression economy are first-pass proposals.

CHOICE 1 / TIER 1

CHOICE 2 / TIER 1

CHOICE 3 / TIER 2

CHOICE 4 / TIER 2

CHOICE 5 / TIER 3

CHOICE 6 / TIER 3

MAID / DEFENSE

Mind the Step [Action]

Guide someone out of trouble.

Effect

Move an adjacent ally 1 legal tile. They take 25% less damage from their next strike before your next activation.

Ready Shield [Passive]

Prepared, not naturally invulnerable.

Effect

With a shield equipped, gain +15 Block during an exchange initiated by an enemy adjacent to one of your other allies.

Clear the Door [Action]

Make room for your charge.

Effect

Make a melee attack with 25% less strike damage. On a damaging opening hit, push the target 1 tile after combat if legal.

Take Cover [Action]

A small gesture saves a life.

Effect

An ally within 2 tiles takes 35% less strike damage until your next activation while it remains on its current tile. Moving ends the effect.

Firm Refusal [Passive]

They cannot simply drag you aside.

Effect

After Wait, you cannot be pushed or pulled until your next activation. Adjacent allies gain the same immunity while adjacent.

Everyone Behind Me [Action; 1/map]

Gather the household behind its protector.

Effect

Choose up to 2 allies within 2 tiles. Each may move up to 2 legal tiles, ending adjacent to you; both take 40% less strike damage until your next activation.

MAID / ASSASSINATION

Innocent Approach [Passive]

Look harmless until the blade is close.

Effect

Your opening dagger strike gains +15 Hit against a target at full HP.

Sleeve Knife [Action; 2/map]

A concealed blade changes the conversation.

Effect

Attack at range 1 using a carried dagger without changing equipped gear. Gain +2 power on the opening strike. Requires an owned dagger.

Divided Attention [Passive]

Strike while someone else holds their gaze.

Effect

Your opening dagger strike gains +15 Crit if the target is adjacent to another living ally of yours.

Cut the Tendon [Action]

Leave the pursuer unable to keep up.

Effect

Make a dagger attack with 25% less strike damage. A damaging opening hit applies Pinned until your next activation.

Back Through the Crowd [After combat; 1/activation]

Disappear behind familiar faces.

Effect

After initiating dagger combat, swap with an adjacent ally if both tiles are legal. Grants neither unit another action.

No Witness to the Draw [Action; 1/map]

The concealed strike arrives before resistance.

Effect

Use a carried dagger at range 1. The enemy cannot counter this exchange. After combat, move up to 2 legal tiles; no new action.

COURTESAN

Comforting Touch [Action]

Restore confidence as well as breath.

Effect

Heal an adjacent living ally for 6 + floor(Mag/2) HP. Remove Shaken if present.

Words of Courage [Action]

Tell someone they can make the shot.

Effect

An ally within 3 tiles gains +15 Hit for its next initiated combat before your next activation.

A Cutting Remark [Action]

Make a dangerous enemy doubt its hand.

Effect

One visible enemy within 3 tiles becomes Shaken until your next activation: -15 Hit.

Shared Breath [Action; 2/map]

Give two companions a moment to recover.

Effect

Heal up to 2 living allies within 2 tiles for 8 + floor(Mag/3) HP each. Cannot target self.

Take Your Place [Action]

Invite an ally into the right position.

Effect

Move an ally within 2 tiles up to 2 legal tiles. It gains +2 attack power for its next initiated combat before your next activation.

Stolen Resolve [Action; 1/map]

One perfectly chosen phrase ruins the attack.

Effect

One visible enemy within 3 tiles has -4 attack power and cannot make speed follow-ups until your next activation. Does not prevent its ordinary action.

SYNTHESIS

Attuned Projectile [Action]

An engineered shot carries internal magic.

Effect

With a bow or firearm, make a normal-range attack using Mag + weapon might against Res instead of physical power and Def.

Reflex Stitch [After combat; 1/activation]

Enhanced nerves catch the recoil.

Effect

After initiating bow or firearm combat, move 1 legal tile. No extra action.

Disrupting Dart [Action; 2/map]

A calibrated dose breaks concentration.

Effect

Make one range-1-3 magical strike: power Mag + 3, Hit 85. A damaging hit suppresses one chosen positive magical status until your next activation.

Barrier Thread [Action; 2/map]

Project a measured dose of protection.

Effect

An ally within 3 tiles takes 40% less damage from its next strike before your next activation. Identical wards refresh.

Predator Lens [Passive]

Read the opening your allies created.

Effect

Your opening bow/firearm strike gains +3 power against Pinned, Shaken or Exposed enemies. Only one bonus even with several statuses.

Concordant Volley [Action; 1/map]

All three disciplines become one deliberate shot.

Effect

Make an Attuned Projectile attack, whether or not you learned that skill. Opening strike gains +4 power; after combat heal an ally within 2 tiles for 8 HP.

MECHANICAL CONTRACT / FIRST-PASS PROPOSAL

Velvet rulings

Maid retains Bow/Sword/Shield/Dagger access; Sophie can begin with a bow and still become a Head Maid. A concealed-dagger action requires a carried owned dagger and uses its might, Hit, Crit and weight for your offensive strikes in that exchange, then returns to the prior loadout. It does not grant an extra attack. Distracted means adjacent to another living ally of the attacker; this represents an opening, not literal facing or invisibility. Courtesan healing and Synthesis status effects are magical; Courtesan social buffs/debuffs and Maid orders are not. Generally ranged does not forbid future melee Synthesis variants.

Action and timing

First-pass design proposal, not an implementation claim. Numbers are starting balance values. One normal activation per unit each player phase: move, then one Action (attack, support, item or Wait). Actions end normal movement unless stated otherwise. Free and Mode skills do not spend that action. A round is one player phase plus one enemy phase; 1/round uses reset at player-phase start. Map uses reset only on a new battle or restart. Durations measured in target activations count the next N activation starts after application and end after the last such activation; a regeneration tick occurs at each counted start. An effect ending at your next activation expires before your movement; an effect ending at activation end may be used during it.

Combat and movement

An attack skill replaces the normal attack and uses normal hit, block, crit, counter and speed follow-up rules unless stated. One opening strike per initiated exchange; an ordinary melee strike uses Str + might vs Def, magic uses Mag + might vs Res. A single magical skill strike without listed Hit uses 85 Hit and no speed follow-up. Prevention of a counter also prevents defender follow-up and Riposte. All distances and adjacency are cardinal Manhattan distance. Movement must follow a walkable path with normal terrain costs unless stated; swaps and pushes require legal destinations. Bonus movement is not a new activation.

Stacking and reactions

Hit, Crit, Block and Avoid bonuses are percentage points. Round down fractional damage/healing unless specified; HP stays between 0 and maximum. Apply percentage damage changes to resolved strike damage after mitigation/block, before HP loss. Outgoing skill damage scalars multiply with the strongest applicable incoming damage reduction; multiple incoming reductions do not stack. Same-name bonuses refresh; different named stat bonuses stack, but each movement trigger grants a choice of one bonus move per exchange/action. Generated splash, turret, Husk and reaction strikes do not trigger additional skills unless explicitly stated. Death bookkeeping still runs; kills by a controlled Husk or turret credit the owner with normal killer XP. Temporary units themselves award no XP when destroyed. A defeated caster loses auras immediately, but already applied timed statuses expire normally. One interception per exchange; controller chooses among eligible defenders. Resolve displacement after combat, never midway through its strike order.

Status and content boundaries

Pinned: -2 Move, minimum 1. Shaken: -15 Hit, Exposed: -3 Def and -3 Res. Bleed: lose 3 HP at each of the next 2 activation starts; can kill. Stat penalties never reduce Move below 1 unless explicitly 0. A target can hold one named body enhancement; replacing it does not erase owed penalties. Healing cannot revive; life-saving wards do not stack, and only one is consumed on a lethal strike. Proposed hooks include active skills, timed statuses, orders, entry reactions and temporary units; implement those hooks before shipping these definitions. These pages do not alter Mihata or grant new permanent campaign systems.

NERATH / PERSONAL DISCIPLINES

Treatment, borrowed remnants and deliberate bodily change. Every choice has a use without an unrelated class prerequisite.

Six choices, one character

Choose exactly one skill from each numbered column, two per tier. Mix rows freely within this board; no prior skill in the same row is required. A skill naming another technique includes that technique only when explicitly stated. Equipment requirements still apply. Class signature skills come from the separate promotion tree. Values and progression economy are first-pass proposals.

CHOICE 1 / TIER 1CHOICE 2 / TIER 1CHOICE 3 / TIER 2CHOICE 4 / TIER 2CHOICE 5 / TIER 3CHOICE 6 / TIER 3

RESTORATION

Triage Step [After heal; 1/activation]

Move on only when the patient is stable.

Effect

After healing a living ally that began below 50% HP, move 1 legal tile. Does not grant another action.

Purge [Action]

Treat the condition that makes the wound recur.

Effect

Remove one chosen Bleed, Pinned, Shaken or Exposed status from a living ally within 2 tiles; also heal 4 HP.

Transfusion [Action]

Take part of the burden into your own body.

Effect

Pay 1-6 HP, never below 1, to heal a living ally within 2 tiles for twice the amount paid. Choose payment before confirming.

Regenerative Seal [Action]

Invest in a recovery that takes time.

Effect

A living ally within 2 tiles heals 6 HP at the start of each of its next 2 activations. Refreshing replaces remaining ticks.

Protect the Patient [Passive]

Give treatment time to work.

Effect

Your healing or regeneration skill grants +3 Def to its target until your next activation. Apply when casting, not on each tick.

Miracle Procedure [Action; 1/map]

Make a costly intervention at the critical moment.

Effect

Heal a living ally within 2 tiles to at least 70% max HP and remove Bleed, Pinned, Shaken and Exposed. You cannot counter until your next activation.

DEATHCRAFT

Funeral Reserve [Passive]

Carry one final kindness from the fallen.

Effect

When a non-summoned living unit dies within 3 tiles, store a Funeral token, maximum 1. Consume it on your next heal for +6 HP. Can trigger once per round.

Bone Screen [Action; 2/map]

A corpse can still hold a doorway.

Effect

Consume an enemy corpse within 2 tiles to place a 15-HP, Def/Res 0 bone wall on its tile. Blocks walking, not line of sight; no wall on an occupied tile.

Borrowed Breath [Action; 2/map]

Give up the body to help the living.

Effect

Consume an enemy corpse within 3 tiles and heal one living ally within 2 tiles of that corpse for 10 HP. Select both before resolving.

Grave Tether [Action]

Make the injured feel the weight of the grave.

Effect

One visible enemy within 3 tiles and below 50% HP becomes Pinned until your next activation. No corpse or servant required.

Final Testimony [Passive]

A nearby death sharpens your next purpose.

Effect

After a non-summoned living unit dies within 3 tiles, your next opening attack before your next activation ends gains +15 Hit. Refreshes; does not stack.

Borrowed Hour [Action; 1/map]

Offer the living one more chance, paid for by the dead.

Effect

Consume an enemy corpse within 3 tiles. Ward one living ally within 2 tiles of it until your next activation: its next lethal strike leaves 1 HP and consumes the ward.

FLESHCRAFT

Conditioned Body [Preparation]

Choose what this body has been trained to endure.

Effect

Before each map choose +4 maximum HP (also +4 starting HP, capped) or +2 Speed for that map. No permanent growth points.

Adrenal Dose [Action; 2/map]

Borrow speed from tomorrow.

Effect

One living ally within 2 tiles gains +1 Move for its next activation, then -1 Move during the following activation; minimum 1.

Predatory Tissue [Action]

Build a hunter that recovers through commitment.

Effect

One living ally within 2 tiles heals 6 HP after its first kill each activation, for its next 2 activations. Occupies its body-enhancement slot.

Dermal Plating [Action]

Trade flexibility for survival.

Effect

One living ally within 2 tiles gains +4 Def and -2 Speed until your next activation. Occupies its body-enhancement slot.

Reflex Graft [Action]

A body prepared for the first incoming blow.

Effect

One living ally within 2 tiles gains +20 Avoid against the next initiating strike before your next activation. Consumed on attempt; one graft at a time.

Perfected Mutation [Action; 1/map]

Maintain a deliberate form for the coming clash.

Effect

Apply Predatory Tissue and Dermal Plating to a living ally within 2 tiles for 2 of its activations, even if not learned separately. Includes -2 Speed; occupies one body-enhancement slot.

MECHANICAL CONTRACT / FIRST-PASS PROPOSAL

Nerath rulings

New temporary-unit proposal: a non-summoned enemy death leaves one corpse for this map; consuming it removes it. Corpses do not block tiles. A Husk acts once per player phase starting the phase after creation, lasts 3 of its activations, has no crit/counter/follow-up, and grants no XP, corpse or Echo on death. It may move then attack, cannot use items or mission interactions, and disappears at map end. Living excludes constructs and undead. Nerath buffs/debuffs are magical; body enhancements include Muscle Weave, Harden Skin, Nerve Surge, Predatory Tissue, Dermal Plating, Reflex Graft and their combined versions. Constructs and undead receive no biological healing.

Action and timing

First-pass design proposal, not an implementation claim. Numbers are starting balance values. One normal activation per unit each player phase: move, then one Action (attack, support, item or Wait). Actions end normal movement unless stated otherwise. Free and Mode skills do not spend that action. A round is one player phase plus one enemy phase; 1/round uses reset at player-phase start. Map uses reset only on a new battle or restart. Durations measured in target activations count the next N activation starts after application and end after the last such activation; a regeneration tick occurs at each counted start. An effect ending at your next activation expires before your movement; an effect ending at activation end may be used during it.

Combat and movement

An attack skill replaces the normal attack and uses normal hit, block, crit, counter and speed follow-up rules unless stated. One opening strike per initiated exchange; an ordinary melee strike uses Str + might vs Def, magic uses Mag + might vs Res. A single magical skill strike without listed Hit uses 85 Hit and no speed follow-up. Prevention of a counter also prevents defender follow-up and Riposte. All distances and adjacency are cardinal Manhattan distance. Movement must follow a walkable path with normal terrain costs unless stated; swaps and pushes require legal destinations. Bonus movement is not a new activation.

Stacking and reactions

Hit, Crit, Block and Avoid bonuses are percentage points. Round down fractional damage/healing unless specified; HP stays between 0 and maximum. Apply percentage damage changes to resolved strike damage after mitigation/block, before HP loss. Outgoing skill damage scalars multiply with the strongest applicable incoming damage reduction; multiple incoming reductions do not stack. Same-name bonuses refresh; different named stat bonuses stack, but each movement trigger grants a choice of one bonus move per exchange/action. Generated splash, turret, Husk and reaction strikes do not trigger additional skills unless explicitly stated. Death bookkeeping still runs; kills by a controlled Husk or turret credit the owner with normal killer XP. Temporary units themselves award no XP when destroyed. A defeated caster loses auras immediately, but already applied timed statuses expire normally. One interception per exchange; controller chooses among eligible defenders. Resolve displacement after combat, never midway through its strike order.

Status and content boundaries

Pinned: -2 Move, minimum 1. Shaken: -15 Hit. Exposed: -3 Def and -3 Res. Bleed: lose 3 HP at each of the next 2 activation starts; can kill. Stat penalties never reduce Move below 1 unless explicitly 0. A target can hold one named body enhancement; replacing it does not erase owed penalties. Healing cannot revive; life-saving wards do not stack, and only one is consumed on a lethal strike. Proposed hooks include active skills, timed statuses, orders, entry reactions and temporary units; implement those hooks before shipping these definitions. These pages do not alter Mihata or grant new permanent campaign systems.

NERATH / THE BODY IS A POSSIBILITY

Physicians, death-workers and flesh-shapers share anatomical knowledge. Outsiders fear what these houses can do; patients know why it matters.

Build direction — proposal for review

Follow one connected promotion path. Each class contributes the two skills printed on its card; keep learned ancestor skills, with explicit upgrades replacing earlier versions. No attribute gates are proposed. Six separate discipline choices allow personal variation; choose one per numbered column, two per tier. Unlock levels, point costs, respec rules and exact balance still need confirmation. This proposal does not change the implemented class-selection system.

RESTORATIVE HOUSES

Healing as decisive field medicine. Rescue someone at the moment the line would break.

DEATH HOUSES

The dead remain useful, but never disposable without a choice. Bodies occupy space; echoes preserve resolve.

FLESH HOUSES

Shape a body for a purpose. Choose the strength and accept the cost.

MECHANICAL CONTRACT / FIRST-PASS PROPOSAL

Nerath rulings

New temporary-unit proposal: a non-summoned enemy death leaves one corpse for this map; consuming it removes it. Corpses do not block tiles. A Husk acts once per player phase starting the phase after creation, lasts 3 of its activations, has no crit/counter/follow-up, and grants no XP, corpse or Echo on death. It may move then attack, cannot use items or mission interactions, and disappears at map end. Living excludes constructs and undead. Nerath buffs/debuffs are magical; body enhancements include Muscle Weave, Harden Skin, Nerve Surge, Predatory Tissue, Dermal Plating, Reflex Graft and their combined versions. Constructs and undead receive no biological healing.

Action and timing

First-pass design proposal, not an implementation claim. Numbers are starting balance values. One normal activation per unit each player phase: move, then one Action (attack, support, item or Wait). Actions end normal movement unless stated otherwise. Free and Mode skills do not spend that action. A round is one player phase plus one enemy phase; 1/round uses reset at player-phase start. Map uses reset only on a new battle or restart. An effect ending at your next activation expires before your movement; an effect ending at activation end may be used during it.

Combat and movement

An attack skill replaces the normal attack and uses normal hit, block, crit, counter and speed follow-up rules unless stated. One opening strike per initiated exchange; an ordinary melee strike uses Str + might vs Def, magic uses Mag + might vs Res. A single magical skill strike without listed Hit uses 85 Hit and no speed follow-up. Prevention of a counter also prevents defender follow-up and Riposte. All distances and adjacency are cardinal Manhattan distance. Movement must follow a walkable path with normal terrain costs unless stated; swaps and pushes require legal destinations. Bonus movement is not a new activation.

Stacking and reactions

Hit, Crit, Block and Avoid bonuses are percentage points. Round down fractional damage/healing unless specified; HP stays between 0 and maximum. Apply percentage damage changes to resolved strike damage after mitigation/block, before HP loss. Outgoing skill damage scalars multiply with the strongest applicable incoming damage reduction; multiple incoming reductions do not stack. Same-name bonuses refresh; different named stat bonuses stack, but each movement trigger grants a choice of one bonus move per exchange/action. Generated splash, turret, Husk and reaction strikes do not trigger additional skills unless explicitly stated. Death bookkeeping still runs; kills by a controlled Husk or turret credit the owner with normal killer XP. Temporary units themselves award no XP when destroyed. A defeated caster loses auras immediately, but already applied timed statuses expire normally. One interception per exchange; controller chooses among eligible defenders. Resolve displacement after combat, never midway through its strike order.

Status and content boundaries

Pinned: -2 Move, minimum 1. Shaken: -15 Hit. Exposed: -3 Def and -3 Res. Bleed: lose 3 HP at each of the next 2 activation starts; can kill. Stat penalties never reduce Move below 1 unless explicitly 0. A target can hold one named body enhancement; replacing it does not erase owed penalties. Healing cannot revive; life-saving wards do not stack, and only one is consumed on a lethal strike. Proposed hooks include active skills, timed statuses, orders, entry reactions and temporary units; implement those hooks before shipping these definitions. These pages do not alter Mihata or grant new permanent campaign systems.

Mihata — Unique Progression V2

Design: Mihata does not use a normal class tree. Her martial growth is capped by poor magical throughput, so she relies on alchemy and transformations. Potions are primarily party tools; forms are powerful self-loadouts with explicit drawbacks.

VEYRHOLD / DISCIPLINE MADE MATERIAL

Sacred engineering, prepared firepower and maintained wards. Build a precise shooter, a position worth holding, or a walking sanctuary.

Build direction — proposal for review

Follow one connected promotion path. Each class contributes the two skills printed on its card; keep learned ancestor skills, with explicit upgrades replacing earlier versions. No attribute gates are proposed. Six separate discipline choices allow personal variation; choose one per numbered column, two per tier. Unlock levels, point costs, respec rules and exact balance still need confirmation. This proposal does not change the implemented class-selection system.

BALLISTICS ORDERS

The weapon rewards discipline: establish a firing position or breach the room.

VEYRHOLD / PERSONAL DISCIPLINES

A prepared shot, a useful tool or an inscription that holds. These choices support the person using the machinery.

Six choices, one character

Choose exactly one skill from each numbered column, two per tier. Mix rows freely within this board; no prior skill in the same row is required. A skill naming another technique includes that technique only when explicitly stated. Equipment requirements still apply. Class signature skills come from the separate promotion tree. Values and progression economy are first-pass proposals.

CHOICE 1 / TIER 1

CHOICE 2 / TIER 1

CHOICE 3 / TIER 2

CHOICE 4 / TIER 2

CHOICE 5 / TIER 3

CHOICE 6 / TIER 3

BALLISTICS

Brace Shot [Action]

Trade mobility for a settled shot.

Effect

Set remaining normal Move to 0, then make a firearm attack with +15 Hit on the opening strike.

Snapfire [Wait replacement]

Watch one lane instead of chasing a target.

Effect

Until your next activation, fire at the first enemy entering legal firearm range for 60% ordinary damage. Hit check; no crit, counter or follow-up. Voluntary movement ends watch.

Suppress [Action]

The shot buys time even when it does not kill.

Effect

Make a firearm attack at 75% strike damage. A damaging opening hit applies Pinned until your next activation.

Corrected Shot [Passive]

Adjust the sight after a failed attempt.

Effect

After your opening firearm strike misses, gain +20 Hit for your next opening firearm strike before your next activation ends. Consumed on attempt.

Crossfire [Passive]

Reward the ally who already engaged the target.

Effect

Your opening firearm strike gains +3 power if the target is adjacent to another living ally of yours.

Decisive Volley [Action; 1/map]

Commit your best firing solution now.

Effect

Make a firearm attack with +20 Hit. If you spent no Move this activation, opening strike also gains +4 power. Ordinary counters and speed rules remain.

ENGINEERING

Field Kit [Action; 2/map]

A prepared tool gives any build a useful job.

Effect

Heal an adjacent construct or device for 12 HP. You may instead give an adjacent living ally +2 Def until your next activation.

Portable Cover [Action; 1/map]

Bring your own piece of defensible ground.

Effect

Deploy a 20-HP, Def/Res 0 barricade on a free adjacent tile. Blocks walking, not line of sight. Does not require the Mechanic class.

Repulsor Tool [Action; 2/map]

Move the obstacle instead of trading blows.

Effect

Push one adjacent unit, ally or enemy, 1 tile directly away if legal. No damage; an illegal destination makes the action unavailable.

Recovery Crew [Action; 2/map]

Get the machinery and the operator back in position.

Effect

Move one adjacent friendly device 1 legal tile and heal it for 8 HP. Cannot move active enemy devices or occupied barricades.

Targeting Lens [Action; 2/map]

Lend someone else your precision.

Effect

One ally within 3 tiles gains +20 Hit for its next initiated ranged combat before your next activation. Works with bow, firearm or magical weapon.

Emergency Resupply [Action; 1/map]

The last prepared tool becomes available again.

Effect

Restore 1 spent use of Field Kit, Portable Cover, Repulsor Tool, Recovery Crew or Targeting Lens to an ally within 2 tiles. Must know that skill; never exceed its map limit.

SANCTUM

Inscribed Plate [Passive]

A small ward answers the first spell.

Effect

Your first damaging magical strike each round deals 20% less damage. Use the stronger reduction if Null Plate also applies.

Unbind [Action]

Undo a hostile inscription on a companion.

Effect

Remove one chosen negative magical status from an ally within 2 tiles. If none exists, give +3 Res until your next activation instead.

Sanctuary Seal [Action]

Choose the ground where someone can stand safely.

Effect

One ally within 2 tiles gains +4 Res until your next activation while it remains on its current tile. Moving ends the effect.

Purity Circuit [Action; 2/map]

Prevent the curse instead of treating it later.

Effect

One ally within 3 tiles ignores the next negative magical status applied before your next activation. Consume only when it prevents a status; damage still applies.

Counterpulse [Reaction; 1/round]

Make the caster feel the ward answer.

Effect

After surviving an initiating magical strike, apply Shaken to its caster until your next activation if it is within 3 tiles. This deals no damage and grants no attack.

Consecration [Action; 1/map]

A deliberate sanctuary for the decisive turn.

Effect

Choose up to 3 allies within 2 tiles. They take 35% less magical strike damage and cannot gain new negative magical statuses until your next activation.

MECHANICAL CONTRACT / FIRST-PASS PROPOSAL

Veyrhold rulings

Devices are new stationary units: targetable, nonliving, occupy their tile, never counter or follow up, yield no XP/corpse, and vanish at map end. A turret lasts 3 player phases after deployment; it gets one controller-chosen shot at the start of each of those phases. No target means no shot. Turret attacks use physical power vs Def and the listed Hit minus target Avoid; no block without a shield, no crit/counter/follow-up. Owner Skill is captured when deployed. Wards are magical statuses; equipment modes, firearm marks and physical tools are not. Seal suppresses a timed magical status, not a class, form or equipment item. Buff durations keep ticking while suppressed. Firearms use existing weapon stats; this pass requires no magazine/reload economy. Targeted skills require visible targets and legal range.

Action and timing

First-pass design proposal, not an implementation claim. Numbers are starting balance values. One normal activation per unit each player phase: move, then one Action (attack, support, item or Wait). Actions end normal movement unless stated otherwise. Free and Mode skills do not spend that action. A round is one player phase plus one enemy phase; 1/round uses reset at player-phase start. Map uses reset only on a new battle or restart. Durations measured in target activations count the next N activation starts after application and end after the last such activation; a regeneration tick occurs at each counted start. An effect ending at your next activation expires before your movement; an effect ending at activation end may be used during it.

Combat and movement

An attack skill replaces the normal attack and uses normal hit, block, crit, counter and speed follow-up rules unless stated. One opening strike per initiated exchange; an ordinary melee strike uses Str + might vs Def, magic uses Mag + might vs Res. A single magical skill strike without listed Hit uses 85 Hit and no speed follow-up. Prevention of a counter also prevents defender follow-up and Riposte. All distances and adjacency are cardinal Manhattan distance. Movement must follow a walkable path with normal terrain costs unless stated; swaps and pushes require legal destinations. Bonus movement is not a new activation.

Stacking and reactions

Hit, Crit, Block and Avoid bonuses are percentage points. Round down fractional damage/healing unless specified; HP stays between 0 and maximum. Apply percentage damage changes to resolved strike damage after mitigation/block, before HP loss. Outgoing skill damage scalars multiply with the strongest applicable incoming damage reduction; multiple incoming reductions do not stack. Same-name bonuses refresh; different named stat bonuses stack, but each movement trigger grants a choice of one bonus move per exchange/action. Generated splash, turret, Husk and reaction strikes do not trigger additional skills unless explicitly stated. Death bookkeeping still runs; kills by a controlled Husk or turret credit the owner with normal killer XP. Temporary units themselves award no XP when destroyed. A defeated caster loses auras immediately, but already applied timed statuses expire normally. One interception per exchange; controller chooses among eligible defenders. Resolve displacement after combat, never midway through its strike order.

Status and content boundaries

Pinned: -2 Move, minimum 1. Shaken: -15 Hit. Exposed: -3 Def and -3 Res. Bleed: lose 3 HP at each of the next 2 activation starts; can kill. Stat penalties never reduce Move below 1 unless explicitly 0. A target can hold one named body enhancement; replacing it does not erase owed penalties. Healing cannot revive; life-saving wards do not stack, and only one is consumed on a lethal strike. Proposed hooks include active skills, timed statuses, orders, entry reactions and temporary units; implement those hooks before shipping these definitions. These pages do not alter Mihata or grant new permanent campaign systems.

World Info

Continent Name:

Vaelora

Nations

Kharazad Dominion: southern desert nation. Martial + mage culture, wealthy, decadent, corrupt, heavily involved in slave and sex trading.

Veyrhold Synod: northern mountain nation. Engineers, magitech, religious doctrine, strict social order. Body-altering alchemy is considered profane.

Nerath Enclave: isolated biomancer and alchemist nation. Healing, fleshcraft, necromancy, body modification. Feared and treated as anathema despite having the world's best physicians.

KHARAZAD / THE BODY IS THE WEAPON

Internal magic becomes martial mastery. Build a duelist, protector, charging lancer, spearwall, berserker or executioner.

Promotion and personal discipline

Follow connected classes, keeping two skills from each learned class; explicit upgrades replace their earlier versions. These are first-pass proposals. Six independent discipline choices below add personal expression without replacing your class. No attribute gates; unlock levels, costs and respec rules remain undecided. Conventional spellcaster trees are outside this martial Arms page.

SWORD TRADITION

Confidence, precision and the discipline to invite a dangerous exchange.

DISCIPLINE

Fighter

Win close exchanges through deliberate footwork.

Measured Cut [Action]

Make a sword attack with +15 Hit on the opening strike. For this exchange, enemy counters suffer -10 Hit.

Footwork [After combat; 1/activation]

After initiating melee combat, move 1 legal tile. Does not grant another action.

SPECIALIZATION

Duelist

Choose your opponent and make their first mistake yours to punish.

Challenge [Action]

Make a sword attack. If the target has no adjacent living ally of its own, gain +3 attack power for the exchange.

Riposte [Reaction]

After dodging or fully blocking the initiating melee strike, make one extra strike before your ordinary counter. Requires a legal weapon range; no reaction chains.

Palace Guard

Your charge is safe while you hold your position.

Intercept [Reaction; 1/round]

Swap with an adjacent ally before a single-target attack and become its defender, if both tiles are legal. One interception per exchange.

Royal Stance [Passive]

After Wait, gain +3 Def and +3 Res until your next activation. Requires an equipped shield.

MASTERY

Blade Dancer

Calm enough to wait, quick enough to make the opening count.

Perfect Draw [Wait replacement]

Wait and prepare until your next activation ends. Your next opening sword strike ignores 30% Def and gains +20 Crit; consume on attempt.

Flowing Chain [Passive]

After initiating sword combat and surviving, gain +15 Avoid until your next activation. Does not stack.

Sun Sentinel

Turn the blow meant for someone else into an oath fulfilled.

Oath Strike [Passive]

After Intercept resolves, your next initiated sword combat before your next activation ends gains +4 attack power and +15 Hit.

Sunward [Action; 2/map]

Choose an adjacent ally. Until your next activation, their strike damage is reduced by 35% while they remain adjacent; you cannot be pushed or pulled.

SPEAR TRADITION

Own the distance: commit to the charge or make the enemy come to you.

DISCIPLINE

Lancer

A practiced reach makes open ground yours.

Long Thrust [Action]

Make a spear attack at exactly 2 tiles with -15 Hit. For this exchange, your spear may also follow up at range 2; enemy counters require their own legal range.

Charge [Passive]

If you spent at least 3 normal Move this activation, your opening spear strike gains +3 power. Bonus movement and teleports do not count.

SPECIALIZATION

Sandstrider

Cross the ground other soldiers fear to break the line.

Vault [Move modifier; 1/activation]

During movement cross one occupied tile and land on the next free tile in the same cardinal direction. Pay 2 Move; cannot cross walls or map edges.

Dune Step [Passive]

Sand, rubble and hills cost 1 Move per tile. Does not grant access to impassable terrain.

Phalanx

The spear is a boundary, not merely a weapon.

Set Spear [Wait replacement]

Until your next activation, strike the first enemy entering an adjacent tile for 60% ordinary spear damage. Hit check applies; no crit, follow-up or counter.

Formation [Passive]

While you have a spear equipped, adjacent allies gain +2 Def. Multiple Formation auras do not stack.

MASTERY

Dune Lance

Commit, strike and escape before the line closes.

Sirocco Thrust [Action; 2/map]

Make a spear attack. If Charge is active and the opening strike deals damage, push the target 1 tile directly away after the exchange, if legal.

Afterimage Step [Passive]

After a combat with Charge active, move up to 2 legal tiles. Does not grant another attack or trigger entry reactions.

Sand Warden

An advancing enemy must pay for every doorway.

Spearwall [Upgrade]

Set Spear can strike 2 different enemies before expiring. Each damaging hit ends that enemy's movement; its action remains available.

Hold Formation [Passive]

While Set Spear is armed, you and adjacent allies cannot be pushed or pulled. Moving voluntarily ends Set Spear.

AXE TRADITION

Choose the frightening commitment: overwhelming a target or pulling it apart for the team.

DISCIPLINE

Reaver

A heavy weapon makes a promise you must be willing to keep.

Heavy Arc [Action]

Make an axe attack with +4 attack power and -15 Hit for the exchange.

Hooking Blow [Action]

Make a range-1 axe attack with 25% less strike damage. After combat and a damaging opening hit, step 1 tile directly away and pull the target into your vacated tile. Both moves must be legal.

SPECIALIZATION

Berserker

Stay dangerous while wounded; risk is part of the build.

Blood Rush [Passive]

While below 50% HP, gain +3 physical attack power.

Reckless Swing [Action]

Make an axe attack with +20 Hit for the exchange. You suffer -3 Def until your next activation.

Breaker

Make the strongest enemy easier for everyone to finish.

Armor Split [Action]

Make an axe attack. A damaging opening strike applies -4 Def until your next activation; the opening strike uses the original Def.

Crushing Hook [Upgrade]

A damaging Hooking Blow also applies Pinned until your next activation, even if the pull is blocked.

MASTERY

Bloodstorm

A wounded fighter who makes one breach become two.

Cleaving Rage [After combat; 1/activation]

After killing your selected target with an axe, strike one other enemy adjacent to you for 50% ordinary axe damage. No crit, counter or further skill triggers.

Last Roar [Passive; 1/map]

A lethal strike leaves you at 1 HP. Gain +15 Hit until your next activation ends. The next strike can still kill you.

Headsman

Execute the threat the team has prepared for you.

Final Sentence [Action]

Make an axe attack. Against an Exposed, Pinned or Armor Split target, the opening strike gains +5 power and +15 Hit.

Dread Presence [Passive]

Adjacent enemies suffer -10 Hit. Multiple copies do not stack.

Six warrior choices

Choose exactly one skill from each numbered column. Assault, Defense and Body Channeling may be mixed freely. These skills support a martial character regardless of their promotion path; obey explicit weapon requirements. No earlier choice is required.

CHOICE 1 / TIER 1

CHOICE 2 / TIER 1

CHOICE 3 / TIER 2

CHOICE 4 / TIER 2

CHOICE 5 / TIER 3

CHOICE 6 / TIER 3

ASSAULT

Lunge [Action]

Commit the last step to reach your opponent.

Effect

If an enemy is exactly 2 cardinal tiles away and the intervening tile is free, step there at no Move cost and make a melee attack.

Flow Through [After combat; 1/activation]

Keep the opponent turning toward you.

Effect

After initiating melee combat, move up to 2 legal tiles, ending adjacent to the target or on its vacated tile if it died. No new action.

Cleave [Action]

A broad commitment catches a second foe.

Effect

Make a melee attack at 75% strike damage. After combat, one other enemy adjacent to you takes a 50% ordinary-damage strike; no crit, counter or skill triggers.

Pressure [Passive]

Force an enemy to defend rather than overwhelm.

Effect

If the target survives your initiated melee combat, it cannot make speed follow-ups until your next activation.

Overrun [After kill; 1/activation]

A fallen enemy opens the way forward.

Effect

After your selected melee target dies, move into its legal vacated tile and then spend any unused normal Move. Does not restore your action.

Execution Window [Action; 1/map]

Exploit the opening the formation prepared.

Effect

Make a melee attack against a Pinned or Exposed enemy. It cannot counter this exchange; opening strike gains +4 power.

DEFENSE

Brace [Wait replacement]

Plant your feet and absorb the commitment.

Effect

Until your next activation, reduce the next strike damage by 35% and resist push/pull. Damage reduction is consumed on a damaging strike; immunity lasts.

Cover Ally [Action]

Put your protection where it matters.

Effect

An adjacent ally gains +3 Def/+3 Res until your next activation while it stays adjacent to you.

Zone Control [Wait replacement]

Claim the doorway.

Effect

Until your next activation, the first enemy entering an adjacent tile ends its movement. It may still attack; voluntary movement ends your stance.

Deflect [Reaction; 1/round]

Survive the first blow; deny the second.

Effect

After surviving an enemy initiating melee strike, cancel that attacker's speed follow-up for this exchange. Does not cancel your ordinary counter.

Reversal [After combat; 1/round]

Turn their overcommitment against them.

Effect

If you dodged or fully blocked the opening melee strike, you may swap with the surviving attacker after the exchange if both tiles are legal.

Last Bastion [Passive; 1/map]

Still standing when the line needs you.

Effect

A lethal strike leaves you at 1 HP; gain +4 Def/+4 Res until your next activation. Your next activation has 0 normal Move. Further damage can kill you.

BODY CHANNELING

Reinforcement [Mode; 1/activation]

Shape your body for the ground ahead.

Effect

At activation start choose Swift (walkable difficult terrain costs 1 Move) or Rooted (push/pull immunity). Lasts until your next activation.

Mana Edge [Action]

Let the weapon carry your inner magic.

Effect

Make a melee attack using Mag + weapon might against Res instead of physical power and Def. Physical armor-breaking effects do not apply.

Surge Step [Before combat; 1/activation]

A burst of control closes the gap.

Effect

Immediately before initiating melee combat, move 1 tile at no Move cost. Destination must be free and walkable; cannot cross walls or units.

Ward Skin [Reaction; 1/round]

Close your guard to the spell.

Effect

When a magical attack targets you, forgo all your return strikes to reduce its strike damage by 35% for the exchange. Usable even without a legal counter.

Force Pulse [Action; 2/map]

Release the pressure you normally contain.

Effect

Push every adjacent unit 1 cardinal tile away from you if legal, including allies. Deals no damage. All destinations are checked before moving anyone.

Overchannel [Free; 1/map]

Demand one final effort from your body.

Effect

After your normal action, take one extra action: move up to 2 tiles OR make a melee attack. Then lose 20% current HP, rounded up but never below 1, and cannot counter until next activation.

MECHANICAL CONTRACT / FIRST-PASS PROPOSAL

Kharazad rulings

All martial paths express internal magic through bodily skill rather than conventional spell lists. Channeling statuses are magical; weapon wounds, combat stances and morale effects are not. A learned weapon-specific skill still requires that weapon, while discipline choices can support different martial equipment. Wait replacements are mutually exclusive: choose one each activation, then apply compatible on-Wait passives. Entry reactions check legal range and hostility as a unit enters a tile; misses do not stop movement unless the skill explicitly says otherwise.

Action and timing

First-pass design proposal, not an implementation claim. Numbers are starting balance values. One normal activation per unit each player phase: move, then one Action (attack, support, item or Wait). Actions end normal movement unless stated otherwise. Free and Mode skills do not spend that action. A round is one player phase plus one enemy phase; 1/round uses reset at player-phase start. Map uses reset only on a new battle or restart. Durations measured in target activations count the next N activation starts after application and end after the last such activation; a regeneration tick occurs at each counted start. An effect ending at your next activation expires before your movement; an effect ending at activation end may be used during it.

Combat and movement

An attack skill replaces the normal attack and uses normal hit, block, crit, counter and speed follow-up rules unless stated. One opening strike per initiated exchange; an ordinary melee strike uses Str + might vs Def, magic uses Mag + might vs Res. A single magical skill strike without listed Hit uses 85 Hit and no speed follow-up. Prevention of a counter also prevents defender follow-up and Riposte. All distances and adjacency are cardinal Manhattan distance. Movement must follow a walkable path with normal terrain costs unless stated; swaps and pushes require legal destinations. Bonus movement is not a new activation.

Stacking and reactions

Hit, Crit, Block and Avoid bonuses are percentage points. Round down fractional damage/healing unless specified; HP stays between 0 and maximum. Apply percentage damage changes to resolved strike damage after mitigation/block, before HP loss. Outgoing skill damage scalars multiply with the strongest applicable incoming damage reduction; multiple incoming reductions do not stack. Same-name bonuses refresh; different named stat bonuses stack, but each movement trigger grants a choice of one bonus move per exchange/action. Generated splash, turret, Husk and reaction strikes do not trigger additional skills unless explicitly stated. Death bookkeeping still runs; kills by a controlled Husk or turret credit the owner with normal killer XP. Temporary units themselves award no XP when destroyed. A defeated caster loses auras immediately, but already applied timed statuses expire normally. One interception per exchange; controller chooses among eligible defenders. Resolve displacement after combat, never midway through its strike order.

Status and content boundaries

Pinned: -2 Move, minimum 1. Shaken: -15 Hit. Exposed: -3 Def and -3 Res. Bleed: lose 3 HP at each of the next 2 activation starts; can kill. Stat penalties never reduce Move below 1 unless explicitly 0. A target can hold one named body enhancement; replacing it does not erase owed penalties. Healing cannot revive; life-saving wards do not stack, and only one is consumed on a lethal strike. Proposed hooks include active skills, timed statuses, orders, entry reactions and temporary units; implement those hooks before shipping these definitions. These pages do not alter Mihata or grant new permanent campaign systems.
